

VINYL FLOORING

Maintenance of your vinyl floor

Everyday care, stain removal and tips to keep your rigid click vinyl floor beautiful for longer.

Regular maintenance

1. Vacuum or sweep to remove loose dirt and grit.
2. Mix a mild, pH-neutral cleaner for vinyl floors with cold water, following the dosage on the packaging (typically about 125 ml in 5 litres of water).
3. Mop the floor lengthwise, in the direction of the planks.
4. Afterwards, mop the floor with a well-wrung mop and leave it to dry for a while.

This way, your floor stays beautiful for longer

1. Vacuum or sweep the floor daily to remove dirt, pebbles, sand, etc. Make it easy on yourself and provide a cleaning mat (without rubber backing): this will keep most dirt out.
2. Apply suitable protection to the legs of chairs, tables and other furniture. Choose beige felts, not coloured ones.
3. Fit office chairs with non-rubber castors for hard floors. Even better, put a protective mat under the chair. It is mainly pebbles under shoes or in the wheels that cause scratches. If you don't use a mat, check the wheels regularly and remove accumulated dirt.
4. Make sure your pets have short nails. This is better for the animal and for the floor.
5. Always use a mild cleaning product. Abrasive or aggressive cleaning products can damage the top layer of the floor. Products based on oil or wax are not suitable.

Caution: prolonged contact with rubber may cause vinyl to react and result in permanent stains. Avoid contact between rubber and your vinyl floor. Therefore, do not use doormats or rugs with a rubber backing.

Stains

Common stains (coffee, wine, sauce, butter, oil, etc.) can usually be removed easily with water and a pH-neutral vinyl floor cleaner.

Stains of asphalt, shoe polish, paint, ink, nail polish, etc. can often be removed with a cloth and synthetic thinner. Always test first on a less visible spot.

Wax or chewing gum can be loosened after hardening with your fingernail or a plastic scraper. If this does not work, use synthetic thinner.

Repeat several times if the stain is not completely removed. Always use cleaning products according to their instructions. Never use abrasive materials.

Scratches

In case of scratches, we recommend a care product for lacquered floors, vinyl and laminate that leaves a protective film on the floor, such as WOCA Master Care. It fills in fine scratches, gives the floor an even shine and makes scratches less noticeable. Always treat the entire floor and use the product according to the instructions on the packaging.
